ADDITIONAL INFORMATION

- Unique double-skirt silicone valve system that drains quickly and effectively
- Each cartridge typically lasts 4 to 6 months up to 1 year for less used urinals
- No complicated cleaning regime required - tolerant of most standard cleaning chemicals and water
- No additional costly consumables
- Small disposable unit = $\varnothing 42\text{mm}$, 51mm depth
- Inconspicuous - does not disfigure urinal design
- Simple bayonet fitting into special housing and easily extracted using the tool provided
- Ideal for planned maintenance regimes on 4 to 6 month cycles (6 months normally recommended)
